GET THE PICTURE

Helux Systems is a specialized SharePoint consultancy, specializing in Information Management, Document Management and EDRMS solutions design and deployment. A certified Microsoft Gold Partner, Helux delivers services that include information analysis, regulatory compliance assessment, system design, custom development, taxonomy development, system configuration, governance, search optimization, and deployment of enterprise-wide solutions.

Just as Microsoft SharePoint 2013 introduces new ways to share your work and work with others, Helux helps your organization manage its information assets in new and exciting ways that bring cost-effective solutions to the enterprise.

Helux also provides SharePoint product development, professional services and training that assists organizations with every aspect of SharePoint planning and implementation. Our expertise spans the information lifecycle—from initial planning through deployment and support. Our SharePoint experts are with you every step of the way.

At Helux, we look beyond what technology can do and focus on what our customers need. Backed by years of experience and innovation, Helux brings high-value solutions to help organizations optimize their information assets.

“By getting to know how we do things, Helux built a system that helped us do things better.”

End-to-End SharePoint Solutions

Helux has the knowledge and expertise that spans the information lifecycle to ensure a successful SharePoint implementation from initial planning, through to development, testing, deployment and support. Our solutions are effective, efficient and delivered on time and on budget.

Information Management

Helux provides organizations with specialized expertise in Information Management and Enterprise Content Management. Each organization is different and has its own distinct culture, responsibilities and objectives. This means that each organization will develop its own information management architecture that fits in with and enhances the existing environment and culture. Helux delivers an integrated solution that is able to address all of the information management needs that support the business processes of your organization.

Electronic Content Management (ECM) and Electronic Document and Records Management Solutions (EDRMS)

Helux SharePoint Solutions deliver on the promise of ECM. We develop solutions for Collaboration, Web Content Management, and specifically EDRMS. Helux can deliver genuine EDRMS compliance on the Microsoft SharePoint platform. We combine the best recordkeeping technology, our strong SharePoint deployment skills, and rigorous EDRMS implementation methodology to ensure you achieve measureable success with your EDRMS project.

Customized SharePoint Development

Helux creates custom SharePoint solutions that fit the way your organization works. Our talented development and architecture team has designed numerous customized SharePoint solutions that include workflow automation, custom Web Parts, SharePoint sites, and quick navigation.

SharePoint Migration and Upgrade Solutions

If you're considering an upgrade to the latest version of SharePoint, or transitioning to SharePoint from your existing document management system, Helux will ensure a smooth migration. Our team will help you make the transition with limited downtime and end user disruption.

Search Optimization

Are you working for your information, or is your information working for you? Your organization has a wealth of information, a lot of which is critical for making sound business decisions. Helux has vast experience in

Our Partners Include:

Microsoft Partner

Gold Collaboration and Content

"In an environment of increasingly fierce competition, keeping revenue has become just as important as acquiring it. Helux streamlined and centralized our processes, which resulted in substantial cost savings and increased productivity."

customizing internal search capabilities, giving organizations the ability to quickly search and find the information they require.

Taxonomy Development

Your enterprise content is of greater value and use when it is properly structured and tagged. Helux develops effective taxonomies and metadata structures that are tailored to your business objectives and goals.

Collaboration

Helux considers collaboration as one of the most effective ways of driving competitive advantage for your organization. SharePoint has the ability to better connect individuals, improve content quality, improve knowledge sharing and encourage better document management and operational efficiency. Every organization requires its own unique collaboration system, and Helux delivers customized solutions to optimize your return on investment.

Governance Planning

Effective Governance Planning is critical for the ongoing success of any enterprise-wide collaboration project. Helux works with your organization to develop a Governance Plan that establishes the processes and roles required to ensure content quality is upheld for the life of your solution.

Professional Services and Training

Helux believes it is crucial to introduce a SharePoint training program to ensure employees are well versed in the technology in order to promote user adoption. Whether you are an Information Worker, IT Professional, or Developer, Helux provides the most comprehensive training for SharePoint 2007/2010/2013. Helux keeps its training simple, relevant and flexible.
