### Questions 36 - 40

Read the passage carefully and answer the questions below.

Recycling means taking materials from products you have finished using and making brand new products with them.

We recycle for many reasons. Recycling products uses less money, less energy and less of the Earth's resources. Because less energy is used, factories do not cause as much pollution either.

There are many things that can be recycled. These include aluminium cans, glass, cardboard, newspapers and plastic bottles. These items can be made into new products including cans or tins that hold food and drink, cardboard boxes, glass jars and bottles, newspapers and office paper. Food scraps, dry leaves or twigs from the garden can also be recycled to make fertilisers for plants.

The best way to **reduce** the amount of rubbish at home is to buy products that use less packaging or use our own bags when going shopping. Another way is to repair broken items rather than replacing them with new ones.

- 36 When we recycle, we make \_\_\_\_\_ products from those that we have used.  
A new  
B good  
C old  
D cheap
- 37 Why do we recycle products?  
A To save money

C To save Earth's resources  
D All of the above
- 38 What items can be recycled to help plants grow well?  
A Plastic bottles, leaves and twigs  
B Aluminium cans, food scraps and leaves  
C Food scraps, dry leaves and twigs  
D Cardboard, glass and newspapers
- 39 The word **reduce** in the last paragraph means  
A choose  
B lessen  
C collect  
D throw
- 40 Which is **not** one of the ways to reduce rubbish in the home?  
A Buy products with less packaging.  
B Use our own bags when going shopping.  
C Repair broken items that can still be used.  
D Replace all broken items found in the home
